3:00pm	Break
3:20pm	Early Surveying Techniques... (Continued)
5:00pm	Adjourn

(8.0 PDHs Offered)

## Situational Ethics for Surveyors

Ethical considerations of business and professional practice have always been of concern to surveyors, but in recent years surveyors have seen an increasing emphasis on the need to understand and put into practice positive ethical attitudes.

Attempts are made to impose ethics on surveyors from several directions including legal, professional and moral. An understanding of the implications of each is important. There will be several focus areas during the seminar that will involve many different aspects of the surveyors practice.

Areas of discussion will include professional practice, business practices, client relations, and personnel relations.

All will be examined from different directions of imposition and degrees of importance.

## Early Surveying Techniques and the Evolution of Surveying Equipment

This workshop will examine early surveying techniques and the evolution of surveying equipment including directional devices, distance measuring equipment, and calculating devices.

Visual aids will depict actual equipment in many variations, original patent diagrams, pictures of surveyors at work, actual survey work products, and numerous other items that depict the life and work of surveyors of yesteryear. This workshop has been certified by ACSM.

## Our Speaker: David Lee Ingram

Mr. Ingram is a Licensed Land Surveyor in three states, having been first Licensed in West Virginia in 1975 and later that year in Virginia. Maryland registration was granted in 1981. He is a 1978 graduate of James Madison University holding degrees in Economics and Business Administration.

Mr. Ingram is an active member of several state and national professional associations including the Virginia Association of Surveyors, West Virginia Society of Professional Surveyors, Maryland Society of Surveyors, and Surveyors Historical Society.

David resides in Mount Crawford, Virginia, where he is the Managing Partner of the firm of Ingram - Hagen & Co., PLC, a firm offering surveying, engineering, land planning, and consulting.
